

TRIANGLE MONOGRAMS

Opentype fonts v1.0

Set of 4 fonts that let you create custom 2- or 3-letter monograms within a triangle, with a black or white background and a choice of decorative frames.

Using the Triangle Monograms fonts:

1. Install the fonts like any others and launch the application you're planning to use them in.

2. Create a new document.

Type a frame first if you want one. The choices are at right, same for all styles. Keystrokes are in red.

3. Type the left letter using lowercase (a-z)

4. Type the center letter using uppercase (A-Z). In the 2-letter fonts, that's it!

5. The right letter is a bit trickier. Use this chart to locate your third letter on the keyboard.

A ... 1	H ... 8	O ... %	V ... = or +
B ... 2	I ... 9	P ... ^	W ... [or {
C ... 3	J ... 0	Q ... &	X ...] or }
D ... 4	K ... !	R ... *	Y ... \ or
E ... 5	L ... @	S ... (	Z ... ; or :
F ... 6	M ... #	T ...)	So the HMT monogram in blue above
G ... 7	N ... \$	U ... - or _	would be typed ?hM)
